## Flying Fox Bat

- Environment: Southeast Asia, prefers coastal regions.
- Diet: Nectar and flowers are favorites, but also eats fruits.
- Special Powers: Well-developed eyesight.
- Social Structure: Noisy and roosts with thousands of other bats.
- Sleep Habits: Usually restless until midmorning, but not always nocturnal.
- Status: Near-threatened

**Gelada Baboon**

- Environment: Ethiopian highlands, in the grasslands and on the cliffs.
- Diet: 90% grasses. They prefer seeds, herbs, flowers, and roots. Sometimes they eat insects too.
- Special Powers: Can chew their food as effectively as zebra.
- Social Structure: Highly social, living in groups of about 15 within greater social circles. They use complex vocalizations.
- Sleep Habits: Active during the day time.
- Status: Least concerning.

## Polar Bear

- Environment: Arctic Circle. They rely on the ocean.
- Diet: Mostly seals, but consume other wild foods, including muskox, reindeer, birds, eggs, rodents, crabs, other crustaceans and other polar bears. Rarely do they eat plants.
- Special Powers: Extremely well developed sense of smell, excellent swimmers.
- Social Structure: Not territorial, mostly solitary, but they like to play and snuggle sometimes.
- Sleep Habits: Active during the day time.
- Status: Vulnerable.

**Red Panda**

- Environment: Eastern Himalayas and Southwestern China (temperate forests).
- Diet: Mostly bamboo, but they also eat mushrooms, roots, acorns, lichens, and grasses.
- Special Powers: Can stand upright for ten seconds at a time.
- Social Structure: Not territorial, mostly solitary, but they like to play and snuggle sometimes.
- Sleep Habits: Active both during the night and twilight period.
- Status: Endangered.
